What to Do if You Think You May Have the Coronavirus

If you think that you may have COVID-19, please contact your primary care provider and your local health department. If you do not have a primary care provider, please contact your nearest emergency room. **Do not show up to any health care facility without calling first.** If you must go out, please use a mask if possible, and always perform good respiratory etiquette and hand hygiene. Be sure to follow the exact advice that your health care providers give you.
